

X2Go bugfix `x2golistsessions: not found`

June 8, 2015 | 0 Comments | Tags: technology, linux, X2Go, bugfix, wedv, berichtsheft

X2Go throws the following **error** while trying to establish a connection:

```
Connection failed sh: 1: x2golistsessions: not found
```

Solution:^[src] You maybe just skipped installing the core software and only got the GUI:

```
sudo apt-get install x2goserver x2goserver-xsession
```
